

VOLCANIC POWDER DRY SHAMPOO

Volcanic Powder Dry Shampoo combines clays, minerals and botanicals from around the world to gently absorb excess oils and toxins, giving hair a natural glow without dusty residue. Its unique formulation dynamically assists in reversing chemical damage caused by synthetic shampoos and even protects against smog, sun and wind.

Its main ingredient, bentonite clay, is a naturally forming volcanic powder that draws out impurities from the roots and follicles while also protecting the scalp's natural oils. Aloe Vera and Prickly Pear powder deliver essential vitamins and anti-oxidants to seal in moisture, fight breakouts and balance pH levels to keep hair shiny and healthy.

How to Use

1. Section your hair into 3 or 4 parts using a comb or fingers. Sprinkle a little powder into your hands or apply directly to scalp. Gently massage the product into your hair with your fingertips, starting with the roots at the crown of your head.
2. Bend over and also apply to the underside roots, again massaging the product in with your fingertips. Lightly dust the oily areas, paying special attention to the roots.
3. For oily hair or a quick volume boost in between washes, apply powder lightly to the top layer of your hair and work through to the roots.
4. To ensure even distribution, use a comb or Pure Boar Bristle Brush to gently work the powder through the hair. Brush outwards from the top of the head, working down to the ends. Then, bending at the waist, brush the underside of the hair, starting at the nape of the neck and working upwards.

Words From Our Customers

"I was so skeptical since in the past dry shampoos have never done well for me. I used your product twice over the weekend and had no issues at all. My hair was not discolored (like past brands) and once I brushed my hair you couldn't see any powdery residue at all. AND, best of all, it allowed me to go 5 days without having to wash, rather than 3. So that was a big bonus in my book since I really don't like washing my hair for some reason. :)" — Jessica
